NO WAR PAPER LOAD ON CANADIAN BANKS

Savings Deposits Are Rapidly Assuming Normal Basis, Last Statement Shows.

BONDS ABSORBED EASILY

United States Exporters Get Advantage Over Dominion Men in British Trade.

Special Despatch to Tan Sux. MONTREAL, March S .- Preliminary figires from the statement of the Canadian chartered banks to the Government for January show further recovery of a pronounced kind from the effects of the Viotory Loan of last autumn. Savings deposits, which dropped from 1,076 millions in October, the highest level ever attained in Canadian banking, to 939 miltained in Canadian banking, to 939 mil-lions in November, were up to 990 mil-lions by the end of January. A recov-lery of about 19 millions in December ery of about 19 millions in December was followed by one of about \$1 millions in January.

Inasmuch as intalments are still ring met on the \$660,000,000 accepted by the Government from subscriptions by the Government from subscriptions to the loan this is an encouraging and in many respects a remarkable showing. Adding together savings deposits and deposits subject to withdrawal on demand, the total to the credit of the Canadian public at the end of January was 1,613 millions, against 1,720 millions on the eve of the loan. It may be said, too, that the portion of the loan remaining unpaid is very small, most subscribers having elected to pay in full at the time of the subscription.

Only a very small proportion of these subscriptions was financed by advances from the banks. If the call loan item of the bank statement is studied it will of the bank statement is studied it will be noted that the extreme rise in the figures over the period of the loan flo-tation was less than 16 millions, and the January statement now shows a downward tendency.

Banks Not Loaded With War Paper While comparisons are odious it is pertinent to draw attention to the fact that the banks themselves in contrast with your banks themselves in contrast with your banks are carrying no load of war loans. Their direct subscriptions to all the internal loans floated in the war period amounted to only \$50,000,000. That subscription was made to the float loans. That subscription was made to the first loan of 1915, and the bonds then taken were sold out on a rising market in a

The war paper in the banks amounts roughly to about \$350,000,000, all of it short dated treasury bills, of which about \$220,000,000 represents British Government obligations and about \$150,bills. The January figures as to the on business, which, fairly brisk before, latter are not presently available, but the estimate is close enough for practical purposes. Before the Government brought out its Victory Loan of last Notwember temporary advances by the banks had risen to 278 millions, but liquidation is now in progress out of the

In any event, instead of the long term Liberty Loans which are tyins up so considerable a proportion of the funds of the American banks, the Canafunds of the American banks, the Cana-dian banks are carrying in war securi-ties only short dated paper, with two years to run at the most, and a good deal of it now nearing maturity. This makes a very comfortable and healthy crops all through the harvest area. deal of it now nearing maturity. This makes a very comfortable and healthy position, the resources of the banks being freely available for the financing of rdinary commercial business of the

Mr. Wood estimates sales of Canadian bonds for the five years 1910 o 1914 at \$1.417.481,922, of which total

ritain 75.10 per cent.
The total sales for the war years. 1915 to 1918 inclusive, are placed at \$2,297,140,715, of which Canada absorbed 61.74 per cent., the United States 34.06 per cent. and Great Britain 4.20

The shifting of the proportions credited to the three countries is striking. The ability of the Canadian people to mance a large part of the war costs has completely upset all competent banking opinion of four years ago. In a further analysis of the figures, for instance, Mr. Wood points out that of all moneys horrowed by the Canadian Government

announced, will be back in the market for such Canadian products as bacon in

WE RECOMMEND Canadian Victory **FENWICK & RYAN**

Tax Free Bonds in Demand.

Further advances in the prices of the tax free bonds of the Dominion Government were viewed this week in the light of some estimates of the probable requirements of the Federal Treasury. The Hon. F. B. Carvell, speaking in Parliament, estimated that in the coming final year revenue from customs duliss. Parliament, estimated that in the coming fiscal year revenue from customs duties, income and profits taxes and excise would fall about \$100,000,000 short of expenditure, including in the latter interest on the war debt, pension fund and other items added by the war to the ordinary outlays of the Government. The prospect that the income tax must be raised considerably above the level of the tax of 1918 has evidently stimulated the buying of the tax free bonds.

Labor troubles continue few and scattered, and on the whole Canada is coming through the winter months with much less of business unsettlement than was expected last November. St. Lawrence navigation will open in two months or less and there is always a seasonal outburst of activity when that period of

or less and there is always a seasonal outburst of activity when that period of the year is reached, even in duil times. The housing plan and the good roads plan of the Dominion both promise to take up a good deal of slack resulting from the closing of munition factories.

For each plan the Dominion Government has established a fund of \$20,000,-000 from which leans will be made to

there is a contemplated outlay of about \$70,000,000 on branch lines and equip-ment for the Canadian National Rail-ways and upward of \$30,000,000 will probably be expended on the Dominion's abiphuliding

Six Sections Are Making Special Studies of Marketing Conditions.

The Canadian Trade Commission has got down to brass tacks in its task of smoothing the path for the Dominion exporter, it was learned yesterday. It proposes to solve at once the immediate problem of getting orders for Canadian products and will cooperate closely with the Canadian Mission at London. The work of this commission has been

divided into the following six sections

fishery products, mineral products, trans portation and import and export permits. These sections are making special studies of marketing conditions for the benefit of these communities, and many of the vital issues were presented with a view to straightening out the difficulties. Among those attending the conference were representatives of Montreal East. Montreal North, Point aux Trembles and St. Michel. All of the delegates at the cases from the considerations which after the cases of the consideration which after the cases of the case of th conference frankly stated the cases which confronted their respective Governments and every effort was made to untargle the situation.

The present legislation, it says, should be thoroughly and at once revised with the twofold object of encouragement of trade to its fullest extent and its flow within channels of legitimacy which inure to the protection as well as to the progress of the people as a whole. It is further recommended that upon It is further recommended that upon the discontinuance of the War Trade Board and the Canada Food Board the Trade Commission shall carry on such portions of the work of these organiza-tions as it may be thought desirable to

The text of the Canadian Trade Com mission's programme covers an extensive and important field of proposed operations and presents a carefully coordi-nated working scheme. The memoran-dum, which in part is in the nature of recommendations, discusses the work i part as follows:

"The work falls naturally into two parts: First, the immediate problem of securing orders for Canadian products in cooperation with the Canadian Mis-sion, London; second, the permannent problem of promoting the development of industries at home and assisting Cana-dian industrial and trading enterprises

"The work first referred to is in its nature of a temporary character and will be largely governed by the degree to which Canadian products can be made speedily available for export. A larger and permanent field of usefulness can be found in improving and extending the measures already in operation to secure foreign trade.

"The Order in Council constituting the Canadian Trade Commission states that "The work first referred to is in its

most effective unity of action in such efforts."

Problem of Markets.

The problem of markets as seen by the candian Trade Commission is as follows: "It is obvious that the commission is charged with the duty of watching the course of industrial development and in framing from time to time when necessary, either on its own initiative or on the appeal of interested departments or persons, detailed schemes for the promotion and assistance of trade and industry. The experience of the last four years has shown that many lines of products can be manufactured in Canada in competition with the world noveled. The amount, terms, &c.

The problem of Markets.

Kuit Goods Trade Depressed.

Special Despotch to The Sty.

Philadelphia. March 2.—Depression exists among manufacturers of hosicry and underwear here because of their inability to secure orders.

Some manufacturers have not an order on their books and have closed their plants and others are preparing to close.
